

# Protect Everything You Operate

Building a Resilient Digital Tomorrow, Together.

In today's fast-paced digital world, the need for security and efficiency in operational environments has never been greater. At OTORIO, we understand the complexities of interconnected IoT and OT environments.

As leaders in industrial cybersecurity, we are committed to delivering innovative and reliable solutions tailored to industry needs. Our goal is to help customers achieve a secure digital future where operations are always protected and performing optimally.

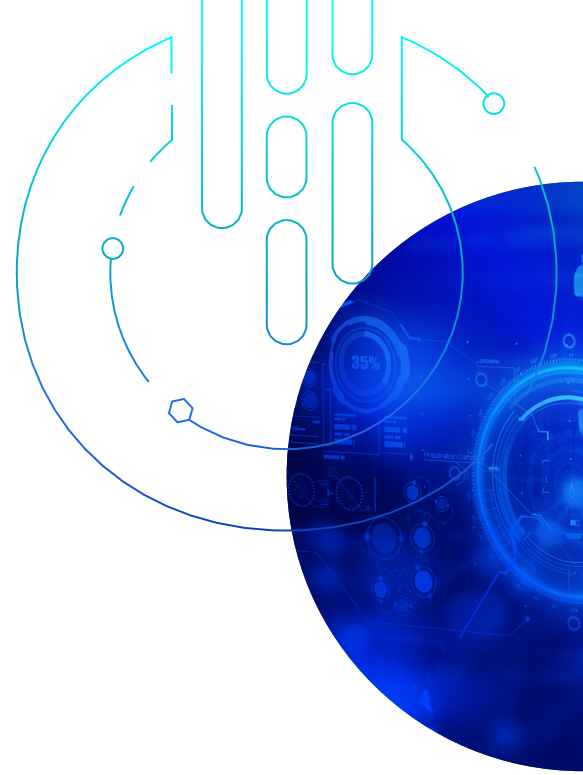

— Daniel Bren, CEO and Co-Founder at OTORIO

**OTORIO is a leader in OT security solutions, dedicated to safeguarding enterprise IoT and OT environments for enhanced safety, productivity, compliance and resilience.**

Our flagship cybersecurity platform, OTORIO Titan, empowers organizations to proactively protect cyber-physical systems and critical infrastructure against evolving threats, paving the way for a secure and resilient digital future.

## Built for IoT and OT Environments

Our solutions are built to proactively protect your operations while enabling continuous growth, regardless of the threats you face.

OTORIO Titan's modular architecture adapts to your specific needs as your business grows and security programs mature. It offers essential tools for visibility and control, as well as advanced applications for exposure management, threat detection, and secure access.

Whether in manufacturing, energy, smart infrastructure, or any other sector, our platform is easy and fast to deploy, and evolves alongside your business to address your unique challenges, providing a short time to value.

## All-Encompassing Cybersecurity Solutions

OTORIO's Titan offers a scalable and all-encompassing suite of applications that seamlessly integrates IoT, OT, and CPS security controls into existing IT workflows to contextually enrich asset visibility, prioritize risk, and drive cost-effective mitigation.

Non-intrusive attack simulations accurately map vulnerabilities and provide impact-driven threat analysis, enabling organizations to make informed decisions that advance security maturity and boost operational efficiency.

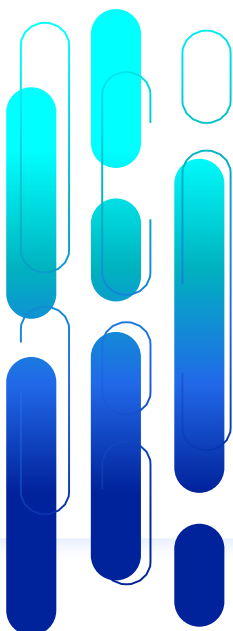

### How OTORIO Titan Works

OTORIO Titan integrates essential and advanced applications to address the unique cybersecurity needs of complex and dynamic IoT and OT environments.

**Essential Applications** offer a unified framework for your operational network. With enhanced visibility, contextual asset inventory, and effective vulnerability management, these tools help you align security goals with business objectives, ensuring robust protection against real-world cyber threats.

**Advanced Applications** further elevate your security posture with features like exposure management with risk prioritization, automated compliance assessments, and continuous threat monitoring. These tools enhance protection, efficiency, and resilience by addressing emerging risks and safeguarding critical assets from supply chain disruptions.

## Why Us?

### Ensure resilience and integrity against evolving cyber threats

OTORIO helps you maintain strong protection, ensuring that operations remain resilient and secure against ever-changing threats.

### Manage security posture effectively with a unified framework

Our solutions streamline security management, providing a cohesive approach to maintaining control over your operational environment cybersecurity posture.

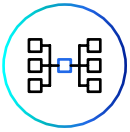

### Address the governance needs of diverse stakeholders

We offer solutions that align with governance and compliance standards, meeting the varied needs of different stakeholders across your enterprise.

### Gain immediate business value across your organization

Implementing OTORIO's solutions results in immediate improvements in security efficiency, enhancing overall business performance and continuity.

### Enrich asset inventory with contextual risk analysis

Beyond basic asset tracking, we provide deep contextual analysis to help you understand and manage risks associated with your industrial assets.

### Ensure impact-driven risk prioritization and mitigation

Our approach focuses on identifying and addressing the most critical risks, ensuring that your security efforts have the maximum impact.
